Dr. William Casey
Director
Central Intelligence Agency
Washington, D. C. 20505

Dear Dr. Casey:

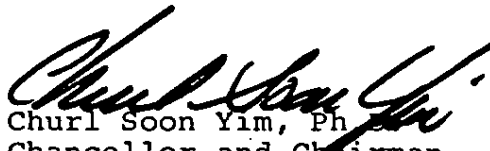

You must have been extremely busy with your demanding job and what with the escalating intensions in the international developments that usually seem to accompany during the Presidential Election year.

Your Alma Mater, Chung-Ang University, is ready for receiving AID's ASHA (American Schools and Hospitals Abroad) grant, through the American Friends of Chung-Ang University, Inc. headed by Dr. Hoxie and Dr. Chennault, to promote medical education for the Third World countries.

A note of recommendation from you would be a powerful boost. Would it be possible to write a brief note? We would appreciate your ongoing support for the spreading of American ideals and practices through your Alma Mater to other Third World nations. Dr. Edward Moffett will call your office while in Washington, D.C. around September 15 in connection with this project.

With highest esteem and best wishes in which all of your admirers at this end join, I am,

Sincerely,

Churl Soon Yim, Ph.D.
Chancellor and Chairman
